

FS Uno/Duo cable fastener for purlins

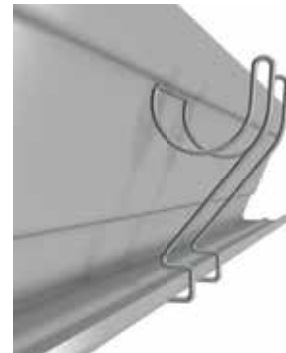

For the fastening of cables and cable tubes to steel purlins

- Direct fastening
- Simple and easy mounting
- Efficient cable bundling due to the use of cable tubes

Schletter now offers a fastener for the fastening of cables to the FS Uno and FS Duo. This fastener is simply put on the profile geometry of the Z-purlin. Optionally, an empty cable tube can be put into the rounded part of the profile that has been designed for this purpose. All cables can be bundled and laid safely.

We recommend a distance of 800 mm between the cable fasteners.
